DETAILED ACTION

The previous office action is withdrawn, and the following prior art rejection is believed to be applicable.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6 and 8-17 are rejected under 35 U.S.C. 102(b) as being anticipated by ***O'Donnell (US Patent 5,718,191)***.

O'Donnell teaches a protective cover 36 including a fabric and an attachment means 26. As seen in the drawings, the fabric is a material which is attractive to at least some animals, and the fabric is inherently configured for transferring heat from a heat emitting structure. The Applicant should note that the heat emitting structure is not positively claimed but only functionally claimed. As seen in figure 4, a pillow or padding is provided. Regarding claim 14, an aperture 48 is provided and is capable of being used for hanging.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over **O'Donnell (US Patent 5,718,191)**. O'Donnell does not teach the use of a material emitting an odor pleasant to at least some animals. In regards to claims 4 and 5, the use of catnip is a notoriously well known material which emits an odor pleasant to some animals, such as cats, and the use of such with the reference to O'Donnell, is believed to be obvious to a person of ordinary skill in the art at the time the invention was made. Regarding claim 7, the specific dimensions is considered to be an obvious matter of choice in mechanical design to a person of ordinary skill in the art the time the invention was made.

Allowable Subject Matter

Claims 18-20 are allowed.

Conclusion

Summary: Claims 1-17 are rejected while claims 18-20 are allowable over the prior art of record.
